

Notes: Ensure Internet connection is normal when updating. Besides, because of many software, it may take several minutes, please wait patiently.

### I. Detection System Upgrade

The system APK automatically detects the version. If there is a version update, a red dot is in the upper right corner of the upgrade button. Click on the upgrade button to prompt "Whether to upgrade software?". If click "Esc" you will directly return to the main interface, you cannot enter the upgrade diagnosis application interface, click "Enter" enter the upgrade diagnosis application interface, and "CANCEL" and "INSTALL" prompts appear. Click on the "INSTALL" and perform the diagnosis application program installation, automatically close the program and install, after installation re-enter the DP interface.

### II. Diagnostic Function Upgrade

Download and upgrade software by "Update". Click Upgrade icon below the upgraded content to view the content of the software update. Click the check box in front of the software name, and then click the upgrade icon in the lower right corner to start downloading and updating. If a software needs to be canceled, just tap the corresponding Check Box. You can search for the updated model required in the search box (Fuzzy Search function), as following photo shown: After the upgrade is completed, you can enter the diagnostic programming to view the upgrade version description and the version number, and you can perform related diagnostic operations and functions.
